

# MAIDA KOSSER

## SOFTWARE ENGINEER

Gujranwala, Pakistan | +92-317-8105371 | maidakosser01@gmail.com | linkedin.com/in/maida-kosser

### PROFILE SUMMARY

High-achieving Software Engineering Graduate (3.71 CGPA) with practical expertise in Frontend Web Development, MERN Stack, and Mobile UI engineering. Proficient in designing responsive component architectures using React.js, React Native, JavaScript (ES6+), HTML5/CSS3, and Tailwind CSS. Experienced in REST API integration, state management, dynamic dashboards, and translating Figma designs into high-performance, pixel-perfect user interfaces.

### TECHNICAL SKILLS & DEVELOPER TOOLS

|                      |                                                                                        |
|----------------------|----------------------------------------------------------------------------------------|
| Frontend & Mobile:   | React.js, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux |
| Backend & Databases: | Node.js, Express.js, PHP, RESTful APIs, MySQL, MongoDB, Firebase (Auth & Firestore)    |
| UI/UX & Prototyping: | Figma, Wireframing, Component Architecture, Responsive Web Design, User Interfaces     |
| Developer Tools:     | Git, GitHub, Vercel, Postman, VS Code, npm/yarn, MS Visio, StarUML, Jira               |

### FRONTEND & TECHNICAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                               |                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| MERN Stack Developer Intern   U Devs, Lahore (Remote)                                                                                                                                                                                                                                                                                                         | Oct 2025 – Jan 2026 |
| <ul style="list-style-type: none"><li>Built full-stack web applications using React.js, Express.js, Node.js, and MongoDB.</li><li>Engineered responsive user interfaces and connected frontend components to backend RESTful APIs.</li><li>Implemented secure authentication and optimized application performance for cross-browser accessibility.</li></ul> |                     |
| Frontend Developer Intern   CodeAlpha (Remote)                                                                                                                                                                                                                                                                                                                | Sep 2025 – Oct 2025 |
| <ul style="list-style-type: none"><li>Developed interactive web pages using React.js, JavaScript, HTML5, CSS3, and Bootstrap.</li><li>Collaborated on modern UI layouts, component modularity, and reusable codebase structure.</li></ul>                                                                                                                     |                     |
| Frontend Web Development Intern   Elevvo Pathways, Cairo (Remote)                                                                                                                                                                                                                                                                                             | Sep 2025 – Oct 2025 |
| <ul style="list-style-type: none"><li>Designed and implemented clean frontend templates with focus on responsive web design and accessibility.</li><li>Integrated state management and API communication using modern JavaScript patterns.</li></ul>                                                                                                          |                     |

### FEATURED FRONTEND PROJECTS

SolarIQ – Solar Monitoring Application | Frontend Lead (Final Year Project)

- Designed and built responsive web and mobile UI dashboards in React Native / MERN stack to display live solar telemetry and power generation analytics.
- Integrated automated billing engines and user-facing AI chatbot interface workflows.

Point of Sale (POS) System | Full-Stack & UI Contributor

- Designed UI wireframes in Figma and built full-stack workflows using HTML/CSS, JS, and PHP.
- Validated dynamic React.js frontend rebuilds and integrated checkout inventory views.

555 Inventory Management System | Frontend Developer

- Engineered a live business inventory management app to track stock levels, product categories, and daily business operations.

### EDUCATION

|                                                                                                                            |                         |
